

Southhill Primary School

YEAR FOUR: AUTUMN TERM 2021

This half term, we will be reading *Deadman's Cove*. As **writers**, we will be writing a finding tale where we will learn about how to build suspense. We will also write a discussion text about a topic that the children feel passionately about.

As **mathematicians**, we will be learning about:

- Mental arithmetic
- Addition
- Subtraction
- Multiplication

As **Scientists**, the children will learn all about the types of teeth, tooth decay and effective teeth brushing. We will look at the digestive system and some of the organs in the human body. We'll even look at animal business...yuck!

As **Designers**, we will look at healthier snack options and look at food packaging. We will. We will also make a wearable digestive system using large white t-shirts and we'll add colour, fabrics, and paints to make the organs of the digestive system look realistic.

Bottoms, Burps and Bile

OPEN WIIIDE – let's take a look inside. We're on a voyage of discovery to investigate the busy world inside your body. Do you have a toothy grin or a winning smile? We shall be taking dental impressions and test the effects of sugary substances on your pearly whites. We'll follow a tasty morsel as it makes its way through your digestive system, helped by some mouthwatering saliva. And don't forget the importance of good hygiene at both ends! And whilst we're talking 'business', could you recognise an animal just by its poo? Are you brave enough to take the challenge? We'll make a working model of the digestive system and use it to try and persuade others to eat healthily. We'll learn how to look after this marvellous belching, squelching, mixture making machine we call our body.
